

# CitizenOne

CIAM built for public sector challenges

RELEASE 3

- Admin/configuration of C1-R3 is built-in
- Self-service addition of services by your system administrator
- HA, DR & WAF come as standard

- Single or multi-tenant deployment provides flexibility
- Computing resources footprint reduced by an order of magnitude
- Designed to support Protected-B deployment

Supports integration with the Credential Engine - which can issue and verify digital credentials

- API-first design - the system can be used as an integration within the environment of your choice
- High Availability design and hosting with built-in Disaster Recovery

- Scalable from municipal through national level deployments
- Built-in accessibility testing capability
- WCAG 2.1 Level AA Compliant

Typical hosting on Azure in two zones, with CloudFlare Web Application Firewall [WAF] and Content Data Network [CDN]

Engineered with the technology stack used by...

## Industry leading DevSecOps
